About Aktuar

We are the leading independent actuarial consulting firm within Austria specializing in actuarial valuations and advisory services to pension scheme trustees. AKTUAR currently administers and advises about 700 clients, varying in size from one to over 9,000 participants. Due to our holder TPA Group, a leading tax advisory and auditing service company in Central and South Eastern Europe, we are well acquainted with regulations, culture and languages in the new EU member states.

By being an independent firm, AKTUAR is able to provide customized consultations and solutions, free from restrictions set by a remote office, giving us a unique position within Austria. For over 20 years, we have advised pension plan sponsors on everything from benefit design and liquidity planning to accounting for pensions and merger & acquisition evaluations. In addition to scheme actuary services, our advice for pension trustees includes but is not limited to pension scheme risk management, member communications and pension scheme governance.

Using our 4-eyes principal and the continuous education of our employees we guarantee our work to be of the highest quality. And, due to our small firm organizational structure, we can attest to providing high quality work at a reasonable cost.

"We see our clients as partners and believe that open, personal communication is the basis for any successful partnership. We believe that by providing customized solutions that fit the individual needs of each of our clients is the best solution, and our clients appreciate it as well."

JOHANNES WIRIUS
Managing Director

"AKTUAR Versicherungsmathematik GmbH has been supporting the packaging group Constantia (www.cflex.com) as our actuary for several years. The cooperation between our firms works exceptionally well, particularly with the exemplary preparation of required documents and the elaboration of the necessary IFRS notes in a significantly short time frame."

GÜNTHER KLEBINGER, Group Accounting & Financial Processes, Constantia Flexibles
